7	Arahne, d.o.o.	www.arahne.si	Arahne develops CAD/CAM software for weaving since 1992. We have installations in 40 countries, export in 2012 is of our income 98%. Our CAD system allows a customer to develop the fabric from idea to final product, drive all necessary machinery (dobby and jacquard looms), make fabric simulation and print technical data. Optionally, system can also be integrated into company's ERP system	CAD/CAM textile design for weaving	We are searching for three possible partners: 1) customers - weaving mills with their own production 2) universities who have textile design program 3) companies who develop ERP software for local market of textile companies, so that we could connect our CAD with their ERP and avoid double data entry. We already have implemented such a system with 5 different providers in Italy and one in USA.	We have no contacts, but can provide a list of potential partners based on internet search. We hope you could call them and get confirmation or denial of their interest.	Our products are quite specific, so we need good preparation (that is: confirmation from potential partners that they will come). Otherwise there is no point in coming to the conference, since "lucky encounters" don't work for us.

8	AS-CAL d.o.o	as-cal.com	We are offering our knowledge, our skills and creativity. Our expertise is drawn from significant experience in industry (Telco, IT, health), technology (storage, WEB, communication, virtualization) and platforms ranging from Linux, Solaris, Windows, ESX, Hyper-v, BMC Remedy, Oracle DB, SQL, MaxDB, MySQL, MongoDB, SharePoint, Exchange, Dynamics CRM), etc. We have the largest team of engineers with BMC Remedy knowledge in the area. Besides our own team we cooperate with experts from partner companies (Protelkom, DevLogic, Bintegra and NTT Data Austria). We are working on local and international projects with high level of success.	e-Health	Our interest is also oriented towards integrations in Telco segments as well as in e goverment.	Not available at the moment.

10	XLAB d.o.o.	http://www.islonline.com	XLAB is a software development company founded in 2001 as a member of the largest Technology Park in Slovenia. In 2011, XLAB was recognized as one of the most innovative and fastest growing companies in Slovenia. Our team has a strong computer science background in the field of cloud computing. XLAB is the creator of award-winning product line called ISL Online (www.islonline.com), which provides SaaS-based remote access, remote support, live chat and web conferencing solutions to connect quickly, simply and securely millions of internet-enabled devices worldwide. ISL Online's solutions empower over 150,000 business users which create over 6 million sessions yearly. We have customers in over 100 countries. Most of them are based in EU, USA and Japan.	Cloud computing	IT companies, System Integrators, Value Added Resellers, Software Distributors, Telecoms, Public Sector, Manufacturers from ALL industries We are looking for a partner (System Integrator, Software Distributor) willing to join our Authorized Reseller Partnership Programme to bring the ISL Online solutions to the market. Our exising customers are mostly small and middle sized companies but also Corporate clients, like banks, insurance companies, governmental institutions, universities, telecoms, manufacturers etc.). We have an unique Enterprise Remote Desktop solution for the Corporate clients, based on the Private Cloud: http://www.islonline.com/technology/private-cloud-remote-services.htm#video	At the moment, we are only working on the localization of the software and other materials into Czech language with two small companies: http://www.worklinesluzby.cz/ http://www.psmedia.cz/	Could you please pass the information above to the ICT companies in Czech Republic and ask them to send me an email to exchange some additional information and arrange a business meeting.
11	ICT Technology Network Institute	ict-slovenia.net	Accelerated development of the innovation system in Slovenia and encouraged cooperation between the industries (ICT, automotive, smart grids, traffic and logistic, health, etc.) are two main goals of the ICT Technology Network (ICT TN). ICT TN was established in 2003 and today operates as a cluster of 45 leading high-tech companies and internationally recognised R&D institutions in the field of ICT. ICT TN is a member of ENoLL (European Network of Living Labs) and several international cluster associations. ICT Technology Network Institute is privately owned institute aimed at coordinationg activities among members and providing support and services, such as: - project management; - information and communication activities; - legal office – for common activities, IPR, etc.; - internationalization and promotions; - social networking (LinkedIn, Twitter, faceBook) For the past 10 years there weere several joint R&D projects carried out within the ICT TN in total value of 96 Million €, 60% financed from the private funds. Recently ICT TN projects are focused on living lab (open innovation) concepts and Internet of Things, where the Institute is coordinating the Competence Centre OpComm, which is the only such IoT centre in the region.	Internet of Things	1. Companies developing technologies, solutions and products in the field of IoT (smart cities, smart factories, smart networks, smart energy, asset and time management, health, etc.), and are interested in collaboration with SLO partners; 2. Cooperation shall be focused on joint development and testing of solutions at various markets and target groups (prototypes, pilot projects. etc.), 3. Additionally we're intereste in cooperation in EU programmes and projects.	Only indirectly at various meeting of clusters, EC meetings in Bruxelles, etc.	ICT TN Institute is representing interests of a bigger group of slovenian companies and R&D institutions, where we can offer higher critical mass of competences, technologies, solutions, in particulary in the field of Internet of things.
12	Avtenta d.o.o.	www.avtenta.si	Avtenta is a subsidiary of Telekom Slovenia aimed at developing and providing ICT business support services for companies and institutions in the area of documents management, human and material resource management, decision-making and mobile use of these solutions. The solutions are based on certified platforms of EMC and SAP corporations. For the purposes of document management we use the BusinessConnect platform of Slovenian company MARG.	e-Commerce	We are looking for contacts with larger companies in the field of energetics and machinery, that are facing issues of different kind of documents needed to be adequately registered, sorted, checked and proved in accordance with specific standards. We are also interested in contacts with ICT providers of the above mentioned companies.	No contacts.
